

Kinsail Solution Suite

OVERVIEW

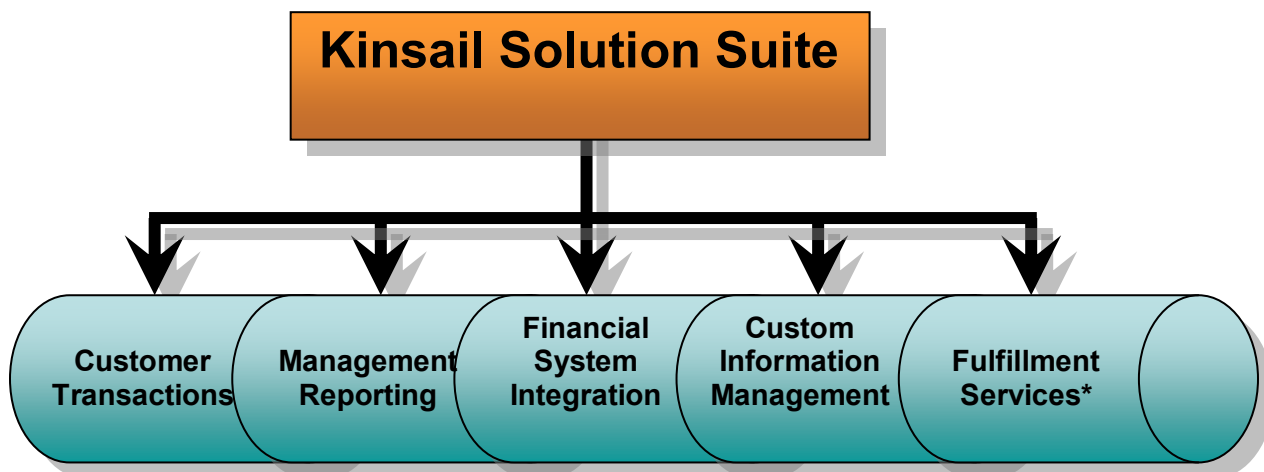

As individual and business customers continue to embrace technology, they expect government agencies to deliver services in the same manner as the private sector. Nowadays, customers of government agencies expect more and more services to be delivered electronically with 24x7 availability. These customers desire the ability to submit information and payment to government agencies online and want expedited fulfillment of their requests. Increased customer demand for services comes at a time when many agencies are experiencing tightening budgets – making the electronic delivery of these services difficult to accomplish.

This is exactly where Kinsail can help. Kinsail is focused on quickly and cost effectively assisting government clients with all manner of information management and payment processing tasks associated with the delivery of government services to individual and business customers. The Kinsail Solution Suite provides a comprehensive solution allowing our clients to securely capture and store required customer information and automatically process payments from those customers.

KINSAIL SOLUTION SUITE

Information collection and payment processing is a time consuming project for anyone. Paper application and payment processing typically requires enormous resource and time commitments from both the government and the individual or business customer.

With that in mind, Kinsail developed a system that tackles the information collection and payment processing issues that many government agencies experience. The Kinsail Solution Suite enables the government to electronically process customer transactions and fulfill delivery of those services. In addition, the solution enables the government to review, manage, and report on customer transactions as well as directly integrate with other existing government financial and other systems.

Furthermore, the Kinsail Solution Suite seamlessly integrates with existing web sites mirroring the look and feel without the usual set-up costs and fees. A fully integrated information collection and payment process provides the best online experience for customers.

Kinsail Solution Suite

HOW KINSAIL FITS IN

The Kinsail Solution makes it easy to capture important customer information and process payments right from your web site. Additionally, the Kinsail Solution Suite offers the tools and integration necessary to ensure that your transaction solution is a success. Below, is illustrated the typical environment in which the Kinsail Solution Suite fits.

KEYS TO SUCCESS

We believe that success is found in the simplicity of a powerful system. As such, we designed the Kinsail system to augment current operations in a way that ensures collecting customer information and payment is a quick and painless task. Seamless integration with existing processes and systems enables our solution to be immediately effective and provide tremendous benefit. Best of all, the Kinsail Solution can be set-up in a fraction of the time to develop and deploy a system in house.

COSTS

In a world of tightening budgets and ever increasing needs, the Kinsail Solution offers an attractive alternative. There are no monthly fees or set-up charges for our processing and management services. In its simplest form, we only charge a flat fee per transaction and a percentage to cover the costs of the financial transaction*. That's all. *No large, upfront development costs, licensing fees, support fees, or other fees.*

* Offline fulfillment services (i.e. delivery of paper documents, etc.) incur an additional processing charge.
